

Regional Knowledge Management for CCAA/CSA

Tackling climate change in agriculture Training

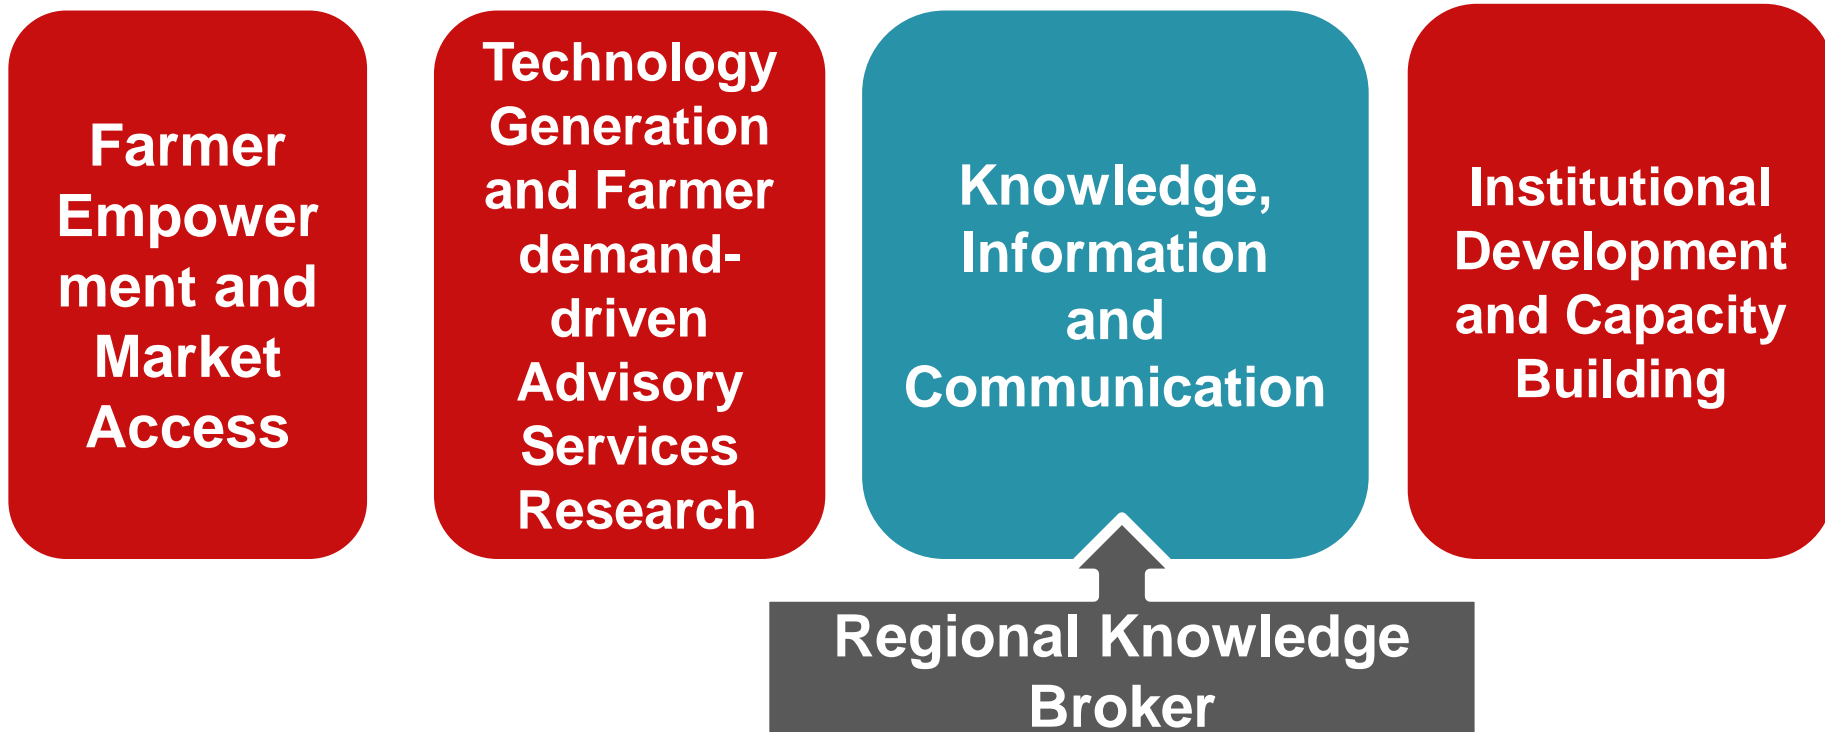

18-22 June 2018, Reduit

Dr. Wiebke Förch, GIZ ACCRA

CCARDESA Focus Areas

CCARDESA mandate: to build and operate a regional information, communication and knowledge management (ICKM) system

Regional knowledge dissemination on CSA

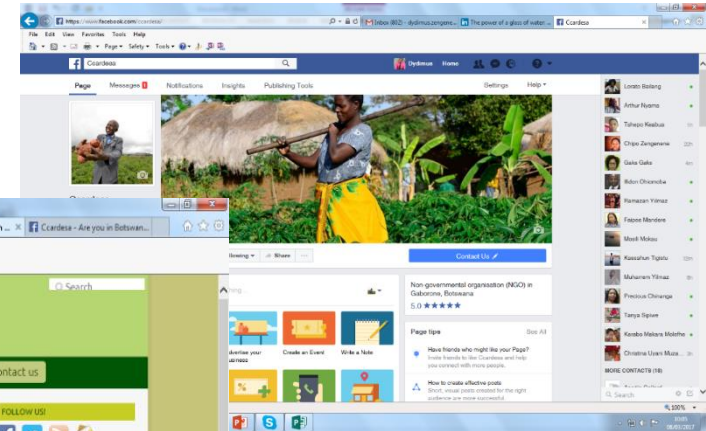

- **Building of a regional knowledge management system at CCARDESA**
 - building a tri-lingual (EN, PT, FR), user friendly, innovative system
 - including online platform, social media, discussion groups and print media;
 - owned by CCARDESA and the 15 SADC member states, open access, possibility for all MS to up- and download information
- Facilitating and supporting a **CoP for ICKM** including focal persons in 15 SADC member states

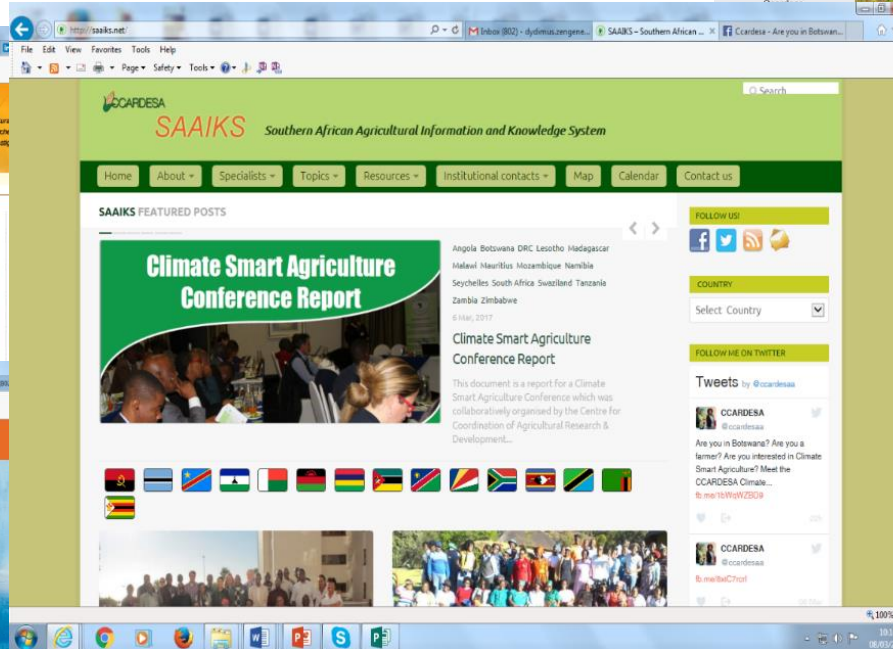

Implemented by

767 followers to date

3411 members to date

312 resources to date

CCARDESA - SAAIKS – Southern African Agricultural Information and Knowledge System **SAAIKS.NET**

Why another platform?

- SADC hungers for quality information (*who is doing what, where, etc.*)
- Information gathering dust on shelves and not shared

SAAIKS

- Online platform hosted by CCARDESA for all 15 SADC states – trilingual
- Driven by a team of focal people in SADC-MS and knowledge volunteers
- One stop shop for regional agric. knowledge products (not stats) – over 400 products shared to date
- Harnesses willingness to share and learn – open access to general public, all SADC member states can up- and download information
- Interoperability with existing platforms – what we don't have we link to

How can you benefit or participate?

- Visit the system and benefit from free downloads, follow us on Facebook and Twitter, participate in discussion fora and get in touch with other experts in the region
- Contribute actively: share information and your knowledge products via SAAIKS – reach 15 SADC Member States
- Encourage partners to share knowledge and learn from others or directly help maintain and feed the online platform
- Share your opinion about the system and its functions with us, we need input for improvements, new features and functionalities
- (System development is work in progress for the next 6 months...)
